

## CompTIA Network+

45 Clock Hours

To better help working adults and Active Duty Military meet their educational goals, InovaTech College of Business & Technology offers a full range of certificate programs and courses geared toward helping members of the workforce stay current in today's demanding job market. Certificate programs offer working adults a convenient, flexible way to earn credentials for career advancement. Certificates are awarded upon successful completion of the required coursework. All course certificates are issued and mailed by the Registrar's Office.

### WHAT IS THE COMPTIA NETWORK+ COURSE?

CompTIA Network+ certification training prepares the student to pass the CompTIA Network+ examination. The Network+ certification certifies that the technician knows the layers of the OSI model, can describe the features and functions of network components and has the skills needed to install, configure, and troubleshoot basic networking hardware peripherals and protocols. A typical candidate will have A+ certification or equivalent knowledge, but A+ certification is not required. The 2002 objectives update the Network+ certification exam with respect to new technologies such as wireless networking and gigabit Ethernet. The scope of networking systems are broadened somewhat, placing an increased emphasis on Linux/Unix, Windows 9x, Windows NT, and Windows 2000. There is also greater emphasis on hands-on training in the areas of network implementation and network support, including troubleshooting scenarios.
